

New product range for **Delicatessen and To-Go**

Up to 100% recycled PET

ST PLAST introduces a new series of PET packaging solutions optimized for use in e.g., delicatessen, bakeries and for the To-Go market. The design of the series focuses on convenience, maximum insight into the packaging and easy recognition across sizes. With 5 different sizes and the possibility to combine several heights of trays and lids in each size, it provides a lot of combination possibilities so that a selling display can be achieved.

The trays and lids have been developed with circularity in mind and are therefore produced in PET with up to 100% recycled PET and are also 100% recyclable.

ST PLAST is already specialized in plastic packaging for fruit and vegetables and cakes.
